

Pond Kits • Skimmers • Filters

Extension Tube

Optional - Allows skimmer to sit back from edge of pond for a natural look.

Flexible PVC Pipe

Carries water from skimmer to AquaFalls filter. Makes installation easier.

AquaFalls Filter

When buried in the ground properly, filters are completely hidden from view. Requires minimal (once per year) cleaning to keep the pond sparkling clean. Filter tubs also provide an ideal base for waterfalls and streams.

Skimmer

Hides pump and plumbing from view. Greatly reduces pond maintenance by skimming debris from surface. Provides an ideal spot for an automatic fill valve which replaces water due to evaporation.

45 Mil Rubber Liner

Strong yet flexible liners have 20 year warranty.

Bottom Drain

Optional bottom drain increases circulation and cleaning of pond.

Underlayment

Provides protection against punctures in liner from sharp rocks or tree roots.

Covering liner with rocks and gravel provides additional surface area for bacteria, also hides and protects liner. Rocks and gravel look more natural than bare liner.

Creating beautiful pond systems is made easy with high quality, compatible components from EasyPro Pond Products.

Our popular pond kits eliminate the time and guesswork of assembling a pond package from scratch. The kits include everything you need to build a beautiful water garden.

Once installed, EasyPro ponds will provide years of enjoyment.

Skimmers

Skimmers add a professional touch to any pond system by hiding the pump from view. Easy to clean filters inside the skimmer provide mechanical filtration and prevent the pump from plugging.

- Unique side-by-side design creates two chambers in the skimmer box, this eliminates cutting filter pads to fit around the pump and plumbing
- Pumps can be inspected or removed without removing mesh net or filter pad
- Innovative design allows you to choose between a vertical filter mat or filter brushes
- Skimmers have a unique flange above the weir allowing rocks to be stacked along side and above the skimmer opening creating a natural looking pond edge
- Choose your skimmer with either a filter pad or filter brushes

Mini Skimmer

- 20" long x 15" wide x 19" tall
- Skims ponds up to 250 square feet - 6" wide water inlet
- Handles flow rates up to 50 gpm

Small Skimmer

- 28" long x 18" wide x 20" tall
- Skims ponds up to 600 square feet - 8" wide water inlet
- Handles flow rates up to 100 gpm

Large Skimmer

- 42" long x 20" wide x 30" tall
- Skims ponds over 600 square feet - 16" wide water inlet
- Handles flow rates up to 300 gpm

Skimmer Extension Tube

Makes you pond look more authentic by moving the skimmer box away from the ponds edge

This 24" long extension tube allows the skimmer to be placed back from the edge of the pond. This will allow for planting and landscaping at the pond edge to conceal the skimmer body. Extension tubes can be bolted together to create longer extensions if needed.

Tube extends the weir away from the skimmer body

Extension is easily disguised in the landscape by placing stone and plants over the top

UltraViolet Clarifier Option

For crystal clear water

EasyPro offers an optional UV setup for our small skimmer (part #PS1FB). The 36 watt bulb is enclosed inside a divider that slips in behind the filter rack. The UV option will drop the maximum gpm flow from 100 to approximately 60 gpm to provide adequate exposure time.

Filters

PRO SERIES

AquaFalls biological filters help keep your pond sparkling clean, they also serve as an ideal starting point for a stream or waterfall. Designed for use with our Pro-Series pond skimmers for a truly professional looking pond.

- Small, medium and large filters have an inlet hole on each side of the filter, this versatile feature allows for convenient installation and the option of adding a ball valved drain
- Easy to install — the faux rock lip bolts directly to the filter body eliminating the need for waterfall foam
- All AquaFalls filters can be ordered with Matala filter pads, the best quality filter pads on the market

Mini AquaFalls - 14" Waterfall Opening

- Provides biological filtration for ponds up to 1,200 gallons
- One piece design (lip is molded into tub) for easy installation
- 1½" inlet fitting in back of filter
- Includes two filter pads and one large mesh bag for filter media
- Maximum recommended flow rate is 40 gpm

Small AquaFalls - 18" Waterfall Opening

- Provides biological filtration for ponds up to 200 square feet and/or approximately 2,500 gallons
- Includes three filter pads and two mesh bags for filter media
- Maximum recommended flow rate is 70 gpm

Medium AquaFalls - 26" Waterfall Opening

- Provides biological filtration for ponds up to 600 square feet and/or approximately 6,000 gallons
- Includes three filter mats and three mesh bags for filter media
- Maximum recommended flow rate is 120 gpm

Large AquaFalls - 50" Waterfall Opening

- Provides biological filtration in ponds over 700 square feet and/or up to 15,000 gallons
- Includes two 3" bulkhead fittings that allow incoming water to enter from either side of filter, also includes three filter pads and six mesh bags for filter media
- Maximum recommended flow rate is 250 gpm

Visit easypropondproducts.com for more information on Matala filter pads

Rock and Plant Grates

This optional grate makes it easy to cover the falls box with rocks and plants. The small filter grate is an egg crate shaped material. Medium and large grates are an engineered structural plastic material.

Unavailable for the Mini AquaFalls.

Termination Strips

AquaFalls filters are available with a termination strip option for installation with real stone falls.

Stones can be secured to the face of the filter box with black waterfall foam.

Pond Kits

These popular pond kits eliminate the time and guesswork of assembling a pond package. The kits include everything you need to build a beautiful water garden. All components of these kits are top quality and compatible with each other. Once installed, these ponds will provide years of enjoyment.

A complete pond kit includes:

- 45 mil rubber liner
- Pond liner underlayment
- Pond skimmer*
- AquaFalls filter/waterfall base
- High efficiency pump
- Check valve assembly
- PVC flex pipe
- All-Season bacteria
- Low voltage underwater light kit
- Waterfall installation kit (includes PVC glue, primer, silicone, liner patch and one can black foam)

*All pond kits include filter brush skimmers, filter pads are available by request.

Small Kits - A backyard watergarden experience for beginners

Part #	Pond Size	Liner Size	Skimmer	Approx. Pond Gallons	Approximate Pump Flow Rate (gph)
ES66FB	6' x 6'	10' x 10'	PSMFB	400	2200
ES611FB	6' x 11'	10' x 15'	PSMFB	750	2200
ES811FB	8' x 11'	12' x 15'	PSMFB	1000	2200
ES11AFB	11' x 11'	15' x 15'	PS1FB	1400	3100
ES16AFB	11' x 16'	15' x 20'	PS1FB	2000	3100

Medium Kits - Complete kits for an intermediate level pond owner

Part #	Pond Size	Liner Size	Pipe Length	Approx. Pond Gallons	Approximate Pump Flow Rate (gph)
EM1116FB	11' x 16'	15' x 20'	2" x 25'	2000	4100
EM1616FB	16' x 16'	20' x 20'	2" x 25'	2900	4100
EM1621FB	16' x 21'	20' x 25'	2" x 50'	3800	5100
EM2121FB	21' x 21'	25' x 25'	2" x 50'	4950	5100
EM2126FB	21' x 26'	25' x 30'	2" x 50'	6150	5100

Large Kits - Impressive features for large scale applications

- Complete kits for ponds over 600 square feet
- Designed for commercial and large scale residential jobs where a truly impressive water feature is desired
- Due to the unique nature of large pond and waterfall applications, custom kits are available by request - contact us for details
