

Underwater Lights

Ponds and water features are transformed at night with the addition of underwater lighting. Mesmerizing night time displays are created with the illumination of moving water in a pond or water feature.

The enjoyment of any water feature is extended with the use of underwater lighting. EasyPro underwater lighting is designed to offer professional grade fixtures with excellent durability and outstanding performance.

EasyPro offers a variety of underwater lighting fixtures including halogen, LED and fiber optic lighting. Traditional halogen options feature economical light fixtures with excellent performance and versatility. LED fixtures offer long life, energy efficiency with very bright illumination and multiple options. Fiber optic systems provide beautiful, color changing effects with multiple lights run from a single shore mounted illuminator box. A full line of low voltage transformers for landscape and underwater lighting is available from 10 watt to 300 watt units.

Underwater Lights

Underwater Halogen Lights:

20 Watt Submersible Lights — 3 Year Warranty

- Light housing is epoxy filled
- Can be used with or without mounting base
