

Aeration Systems

EasyPro aeration systems are a great way to aerate, destratify and circulate water in ponds and watergardens. Our high quality aerators are ideal for both summer aeration and winter deicing. These units are powered by quiet, continuous duty compressors that only cost pennies a day to operate!

The increased oxygen levels and circulation provided by aeration has a positive effect on ponds year-round, from preventing fish kills in the winter to helping reduce algae, sediment and odor in the summer. Our compressors are reliable with few moving parts making them less likely to need repair. Use for winter deicing to save money over standard heaters or deicers. Kits come complete with compressor, tubing and diffuser.

Aeration Systems

Aeration System Features:

Ornamental Pond Aeration/Deicer System

Up to 800 gallon ponds

High quality, continuous duty — ideal for both summer aeration and winter deicing in ponds up to 4' deep. Powered by quiet, continuous duty, 115v compressor with one year warranty.

Economy Linear Aeration System

1,000 to 8,000 gallons ponds

These diaphragm linear aeration kits include weather proof compressors allowing use outdoors without further protection. Powered by quiet, continuous duty compressors, these small aerators do a great job of aerating all year long in ponds up to 6' deep.

A great value with a two year warranty!

Deluxe Linear Aeration System

1,500 to 20,000 gallon ponds

These piston linear aeration systems are the finest systems on the market! They offer one of the longest warranties (three years) of any air pump available because they are the best built are pump you can buy.

- Super quiet — barely audible from 5' away
- Energy efficient — operates for pennies a day
- Very reliable — motors can often run continuously for five to eight years
- Oil-less design — provides clean, dry air with minimal maintenance
- UL listed for outdoor use.

EasyPro offers an extensive line of linear compressors and diffusers for ornamental and koi ponds.

When the demand for a system goes beyond that of a standard kit, EasyPro has the options needed to properly aerate nearly any size pond!
