

Features

EasyPro's family of water treatment products is designed to work together to achieve the natural ecological balance your pond needs to maintain clean, clear water.

EasyPro Water Clarifier is one of the most concentrated water clarifiers (flocculant) available. This formulation is also one of the safest at achieving water clarity in water gardens, koi ponds and fountains. It attracts suspended particles together, allowing them to settle to the bottom of the pond to be removed by a filtration system.

- Eliminates murky water caused from mud, clay, decaying plant material, excess fish food & fish waste
- Concentrated formula clears murky water fast
- Attracts suspended particles together allowing them to settle out of the water column
- Maintains a healthy, balanced ecosystem and reduces pond maintenance

1 fl. oz. per
1,000 gallons

Directions for Use

- Apply 1 fl. oz. per 1,000 gallons of pond water to maintain clear water. Actual dosage rates will vary depending on particle type and concentration levels.
- For best results, pre-mix the recommended dose with pond water, then spray solution over entire surface of the pond.

This product works on organic particles such as decaying plant material and fish waste, as well as inorganic particles such as mud and clay.

KEEP OUT OF REACH OF CHILDREN

Safe for fish & aquatic life

When to Use

- To increase water clarity
- Spring, summer and fall — as needed

Sizes
