

Barley Straw Pellets

EBP5 • EBP10 • EBP40

Features

EasyPro's family of water treatment products is designed to work together to achieve the natural ecological balance your pond needs to maintain clean, clear water.

EasyPro Barley Straw Pellets are all natural and less messy than traditional barley straw bales. Once exposed to pond water, these barley straw pellets will quickly begin to break down and release active ingredients that help keep pond water clean and clear. As they break down they produce a steady and extended release for up to eight weeks.

- All natural formula - steady, extended release of humic acids
- Safe for use with aquatic life and pets
- Keeps water clean and clear
- Works fast
- Maintains a healthy, balanced ecosystem and reduces pond maintenance

1 Scoop per 300 gallons

Directions for Use

Includes 8 oz. scoop for application (bulk sizes do not include scoop).

Barley Straw Pellets can be applied directly to the pond water. It is best to be applied where water is moving and less than 3 feet deep. Water may become cloudy after application. This will clear after a few days. Can also be placed in mesh bag in a biological waterfall filter.

Application (water features & koi ponds):

- Apply 8 oz. (1 scoop) per 300 gallons of pond water
- Re-apply every six to eight weeks

Large pond applications:

- Apply 120 lbs. per surface acre, broadcast the pellets into the pond
- Re-apply every six to eight weeks

KEEP OUT OF REACH OF CHILDREN

Safe for fish & aquatic life

When to Use

- To increase water clarity naturally
- Early spring and summer, every six to eight weeks

Sizes

Part #	Description	Size	Treats Up To
