

Take Control of Your Project

Use to fill in cracks between rocks to prevent water from being "lost" over the waterfall or around water features.

- Improves water flow visually and black color hides foam in the shadows of the rocks
- Minimal expanding foam - better density, better control and less waste
- Hand foam cans have a patented trigger system and a 'stow straw' which allows multiple uses for up to two weeks.
- Trigger will dispense foam in any position
- Use of carbon black for inherent color rather than black dye that fades
- 18 month shelf life
- Fish safe, non toxic formula

See how our black waterfall foam can improve your waterfall. Visit www.easypro.com.

The Best on the Market

Here's why . . .

Compare our foam density and fade resistance to the competitors.

Foam Density

Competitor

Fade Resistance

Competitor

Black Color Foam

- We use carbon black for the color, not dye
- Carbon reduces UV deterioration of foam
- Blends quickly with rocks and disappears behind flowing water
- Cured product is safe for aquatic plants, animals and pets

Minimal Expanding Foam

- Better density for secure rock placement and design
- Better control during application
- Less waste – less foam to trim away

Re-usable 20 oz can with easy-to-use dispersing trigger

- Dispenses in any position - at any angle
- Reusable system – Stow Straw allows multiple uses from the same can
- Right size for the job – no one uses just one 12 oz. can when creating a water feature
- Better value – larger can allows lower unit cost
- 2 year shelf life from date of manufacture

SPRAY & STOW TECHNOLOGY!

SPRAY

Trigger system dispenses from any angle. No expensive gun needed!

STOW

Straw folds down for storage allowing you to store unused product for up to two weeks. Less waste!
