

# ECO-CLEAR

## Pressurized Filters

### Excellent dual filtration!

**Ideal for preformed ponds and small water features needing effective filtration.**

Eco-Clear Pressurized Filters have filter pads to collect solid debris and bio-media to provide biological filtration. Models also available with built-in UV clarifiers for the ultimate in pond filtration!

- Sturdy filter housings – can be partially buried up to the cleaning ring for easy concealment
- Dual filtration – filter pads collect solid debris; bio-media provides biological filtration
- Optional UV for crystal clear water
- Filters are easy to disassemble and clean, making maintenance a snap!
- Multi-step connectors – inlet/outlet fittings accept a variety of tubing sizes
- Three year warranty

**EC3900 / EC3900U**  
for ponds up to 3900 gallons

**EC2600 / EC2600U**  
for ponds up to 2600 gallons

**EC1300 / EC1300U**  
for ponds up to 1300 gallons

#### EC2600 and EC3900 unit bonus features

- Cleaning indicator shows when filter needs to be cleaned
- Backwash valve to extend time between full cleanouts

#### Eco-Clear Complete System

Eco-Clear Filters are also available in a complete kit with Eco-Clear Pumps. It's complete pond filtration made simple!

# FEATURES/PERFORMANCE

THE ULTIMATE SUBMERGED FILTERS

## Features

- ① Optional UV for crystal clear water
- ② Cleaning indicator – shows when filter needs to be cleaned\*
- ③ Backwash valve to extend time between full cleanouts\*
- ④ Backwash port\*
- ⑤ Multi-step connectors – inlet/outlet fittings accept a variety of tubing sizes
- ⑥ Sturdy filter housings – bury up to cleaning ring for easy concealment
- ⑦ Dual filtration – filter pads collect solid debris while bio-media provides biological filtration

Filters are easy to disassemble and clean, making maintenance a snap!

\* Cleaning indicator, backwash valve/port. PVC connectors are not included on EC1300/EC1300U units.

## Specifications

Model	Volts/ Frequency	UV Wattage	Cord Length	Pond Size*	Fittings Included	Maximum Flow	Unit Size W x D x H
EC1300	/	/	/	650 gallons with fish	1/2", 3/4", 1" Step barb fittings (2)	1300 gph	14.8" x 12.24" x 15.47"
EC1300U	115V 60Hz	9W	16 ft.	1300 gallons without fish			14.8" x 12.24" x 15.47"
EC2600	/	/	/	1300 gallons with fish	1", 1 1/4", 1 1/2" Step barb fittings (3)	2600 gph	21.26" x 14.92" x 17.48"
EC2600U	115V 60Hz	18W	16 ft.	2600 gallons without fish			21.26" x 14.92" x 18.43"
EC3900	/	/	/	1950 gallons with fish	1", 1 1/4", 1 1/2" Step barb fittings (3)	3900 gph	21.26" x 14.92" x 21.73"
EC3900U	115V 60Hz	24W	16 ft.	3900 gallons without fish			21.26" x 14.92" x 22.68"

\*Fish load, feeding rates, amount of sunlight and other factors affect actual maximum gallons filtered.

## How IT WORKS!

Dirty pond water enters the pressurized filter.

Water is pushed through multiple densities of foam filters and cleaned of solid debris.

Water is pushed through bio-media that provides excellent biological filtration.

Select units have high-intensity UV lights that destroy algae cells, eliminating green water.

Cleaned water is returned to your pond.
