

Bubbling Features

Bubbling fountains and statuary are a popular way to bring the relaxing sound of water into small spaces. These features can be used outdoors or indoors, buried in the ground or used free standing on patios and decks.

For those who desire water but do not have the space to construct a pond or a Just-A-Falls system, these are the perfect answer! EasyPro offers several very realistic looking fountain and statue pieces for use with basins or as a stand alone feature. Complete kits are available or buy items individually as needed.

Basins

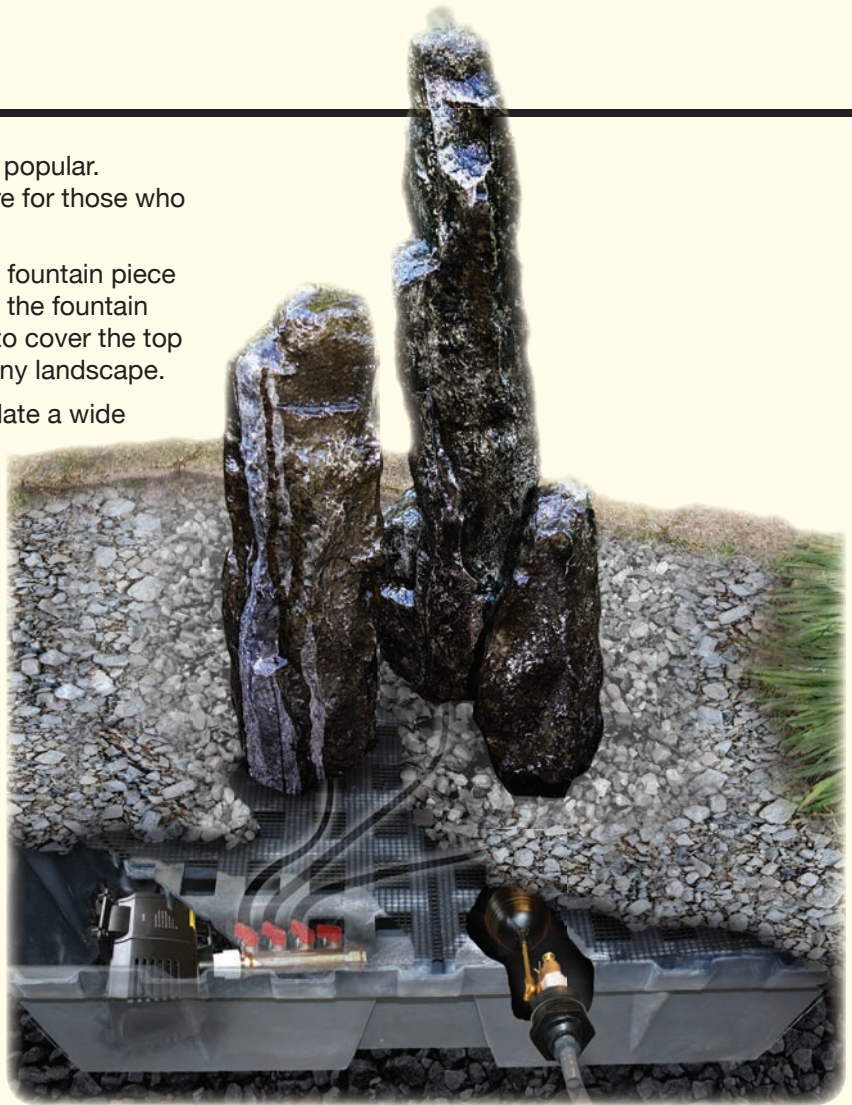

Disappearing fountains, statues, vases and rocks are very popular. EasyPro basins offer a simple way to create a water feature for those who do not have space for a pond or Just-A-Falls system.

The basin is placed in an excavated hole and a decorative fountain piece is placed on the top. A submersible pump is connected to the fountain and then placed inside the basin. Using decorative stone to cover the top puts the finishing touch on a simple way to add water to any landscape.

EasyPro offers a number of styles and sizes to accommodate a wide variety of decorative fountains.

P
SERIES
PRO
