There are so many ways to have fun with your landscaping and gardening projects that include the Basalt fountain products. That will add years of enjoyment.

See reverse for installation instructions. For more information contact your local Authorized EasyPro® Distributor or Dealer.

Install in 6 Easy Steps

Step 1

Dig a hole to the shape of the basin, compact and level substrate under the basin

Step 2

Install the basin, level and backfill evenly around the basin. Tamp the backfill to firm the soil. Your basin may vary from the basin shown.

Step 3

Place Basalts using shims to level. Review placement from a distance and make desired adjustments. Your basalts may vary from the basalts shown.

Step 4

Install the pump, splitter, and tubing in the basin through the access panels.

Step 5

Run the tubing and light cords through the basalt columns. Connect retainer ring and light to tubing. Light enhances the water bubbles.

Step 6

Fill the basin with water and balance water flow with a splitter. Add decorative stone, landscaping and enjoy
