

EASYBOG™

Wetland Filtration Modules

EasyBog™ Pond Filtration Cube

Media-filled Res-Cubes that are ideal for wetland/bog filtration systems. Traditional wetland filters are typically filled with gravel layers which are hard to clean. EasyBog™ Cubes use a plastic media which is not only easy to clean but has a very long life cycle.

- EasyBog™ Pond Filtration Cubes have over 1000 sq ft of surface area creating a highly effective bio-filtration environment
- Each Cube filters up to 2500 gallons of pond water
- Cubes come ready to install - assembled and pre-filled with media. Super fast and easy!
- Clips secure cubes together for a stable structure (sold separately)
- Buy individually and build your own bog filter or opt for a complete EasyBog™ Small Pond Filtration Kit shown on reverse.

EasyBog™ Cube Filtration Module
