

ROCK LIGHT

4 Watt LED

Rock-Shaped - Easy to Conceal!

Realistic rock cover is molded from actual rock for a natural look that blends into the landscape of ponds, waterfalls and gardens.

Super bright, warm white lights are fully submersible and may be used in or out of the water.

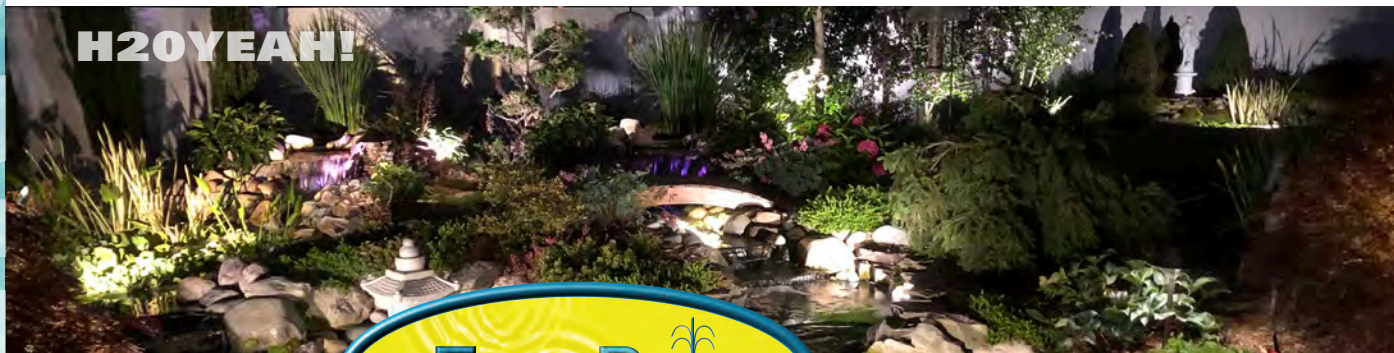

- Use in or out of water. *Rated IP68*
- Design of rock cover allows user to change direction of the light beam
- Stainless steel housing for long life. Safe for chlorine and salt water.
- Light features optical lenses to maximize illumination
- Designed with an added flat surface to angle the beam upward
