

Features

EasyPro's family of water treatment products is designed to work together to achieve the natural ecological balance your pond needs to maintain clean, clear water.

Salt is essential for fish health. Koi and goldfish need salt to control their electrolyte balance. Salt also promotes the natural slime coating of fish, which protects against fungus and disease as well as reduce stress.

- 99% pure – made from evaporated sea water
- Reduces fish stress and increases disease recovery
- Additional electrolytes
- Enhances the natural slime coating on fish
- Superior to table salt (sodium chloride) for maximum effectiveness

Directions for Use

- Use one to two pounds per 100 gallons of water under normal conditions
- Use three pounds per 100 gallons of water when treating for disease
- Best if mixed with pond water in slurry and spread around perimeter of pond
- Take care to avoid direct contact with pond plants

KEEP OUT OF REACH OF CHILDREN

Safe for fish & aquatic life

When to Use

- To reduce fish stress and increase disease recovery time
- Spring, summer and fall — as needed
